

## PWC LIFTS

**Our cantilever-style personal water craft lifts are available as either single (1000# or 1300# capacity) or double (2000# cap) lifts.**

**We use 6' rubber-topped aluminum bunks to protect your PWC.**

**The carriage will raise your PWC 42" above the lake bottom and the bunks sit 8" above the carriage. The rear legs of the PWC lift allows up to 12" of adjustment.**

**The double PWC lift has 2 sets of bunks on 1 carriage. The bunks are set at 2 different heights, so that 1 PWC will float off first (if you are only using 1) and the 2nd would stay high and dry unless you **continue** to lower the carriage.**
